

## Learn how to develop a preparative process – from phase selection through scale-up to purification!

### Contents and learning objectives

- Three steps to your preparative method – How you carry out preparative method development
- Find the balance between purity, yield and productivity – the “triangle” of preparative chromatography!
- Spoilt for choice – how you select the most suitable column
- What you need to consider in method development
- How you determine optimal loadings
- What you need to consider in scale-up
- Troubleshooting tips

### You decide on the location!

We will be happy to welcome you to a seminar at our European headquarter in Dinslaken (close to Düsseldorf).

- You can't attend a seminar at our site?
- You want a group of your colleagues to benefit from our seminars?
- You expect a specific seminar tailored to your needs?

## Of course, you can also book a seminar at your site!

### Your benefits:

- Topics and duration according to your specific requirements
- Date and location by choice
- Flexible number of attendees
- Fixed costs
