(The Japanese Pharmacopoeia 17th; Purity (3) Related substances)

\*1 All system performance test and standard solutions were prepared from Nafamostat mesilate supplied as a reagent for laboratory use.

\*2 The JP 17th indicates to use mesilate form as 6-Amidino-2-naphthol, but hydrochloride form is used in this data sheet. Therefore, the sample concentration of 6-Amidino-2-naphthol is changed from 0.025 mg/mL to 0.0195 mg/mL.
