

YMC Europe and YMC ChromaCon

Boost your oligo purification

On **September 22**, YMC Europe and YMC ChromaCon are pooling their expertise in a compact, practice-oriented webinar. The focus will be on the right resin selection and continuous chromatography for the efficient **purification of oligonucleotides**. Take your process to the next level: maximise productivity and yield while minimising costs and solvent use.

What to expect

- **Master large-scale oligo purification:**
key steps and why thorough screening matters
- **Develop smarter batch methods:**
choose the right solvents, pH and buffers for efficient results
- **Optimise with continuous chromatography:**
boost productivity and yield while cutting costs
- **Advance sustainability:**
reduce resource use without compromising performance

Event details

When? Monday, 22nd September 2025
3:00 PM – 4:30 PM (CEST)

Where? Online via Microsoft Teams
